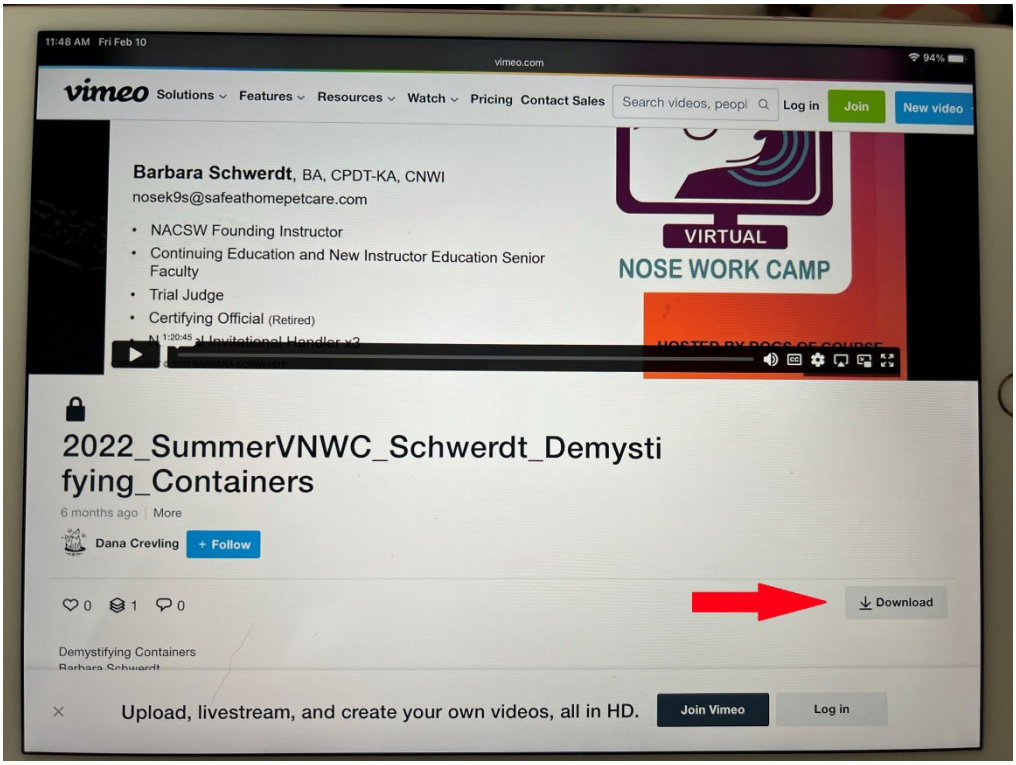
3/2025

These directions are from 2024. It is possible that there have been some changes. Please contact Dana or Michele if these directions are not sufficient to help you download.

Thank you.

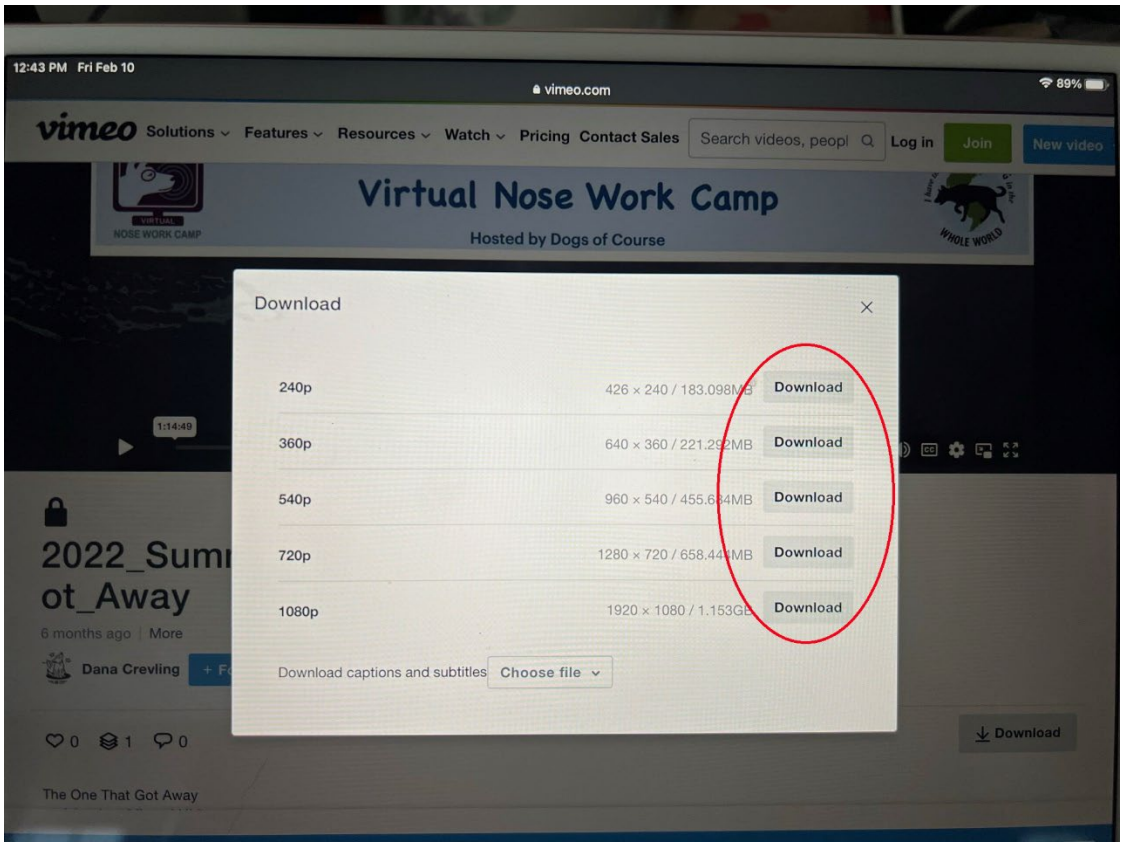
Download from Vimeo to iPad

1) Ensure that you are running the latest version of iOS on your iPad, and that you have sufficient storage capacity. Make sure that the Files app (from Apple). These instructions have been tested with iOS versions 16.2, 16.3, and 14.7.
2) Open Chrome on your iPad and click on the recording link provided in your email. Enter the password as provided in the email. Click on the Download button.

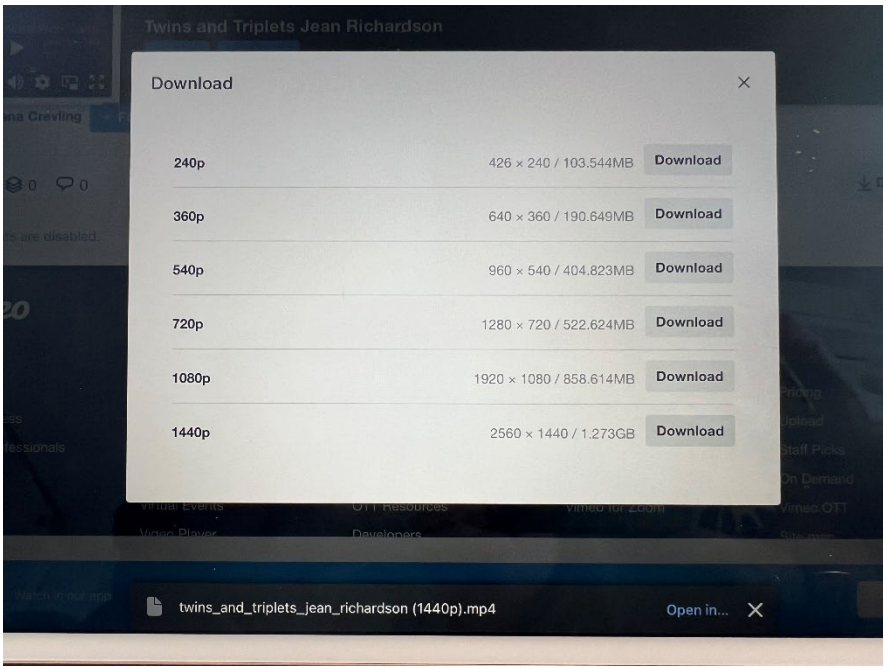


2025 Note: Vimeo moved the download button to the left side under the file name and is only using the icon when viewed on a computer.

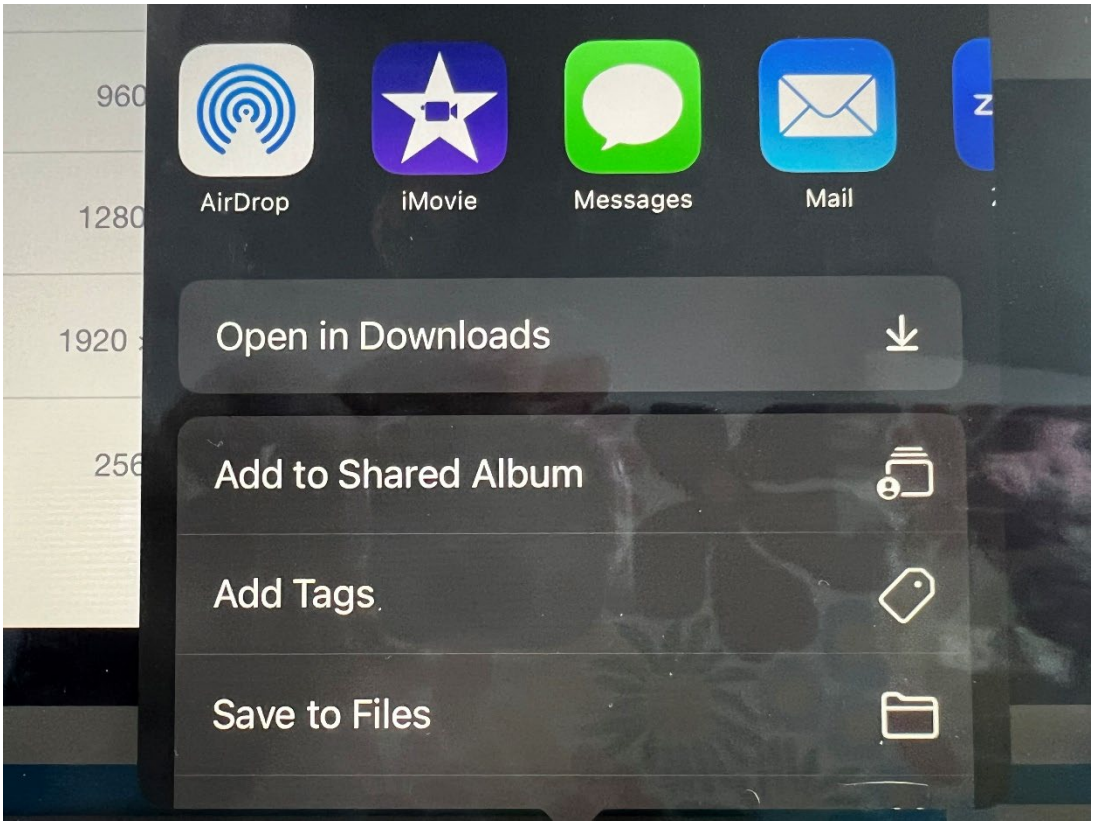
3) On the next screen, select your download resolution and click download.



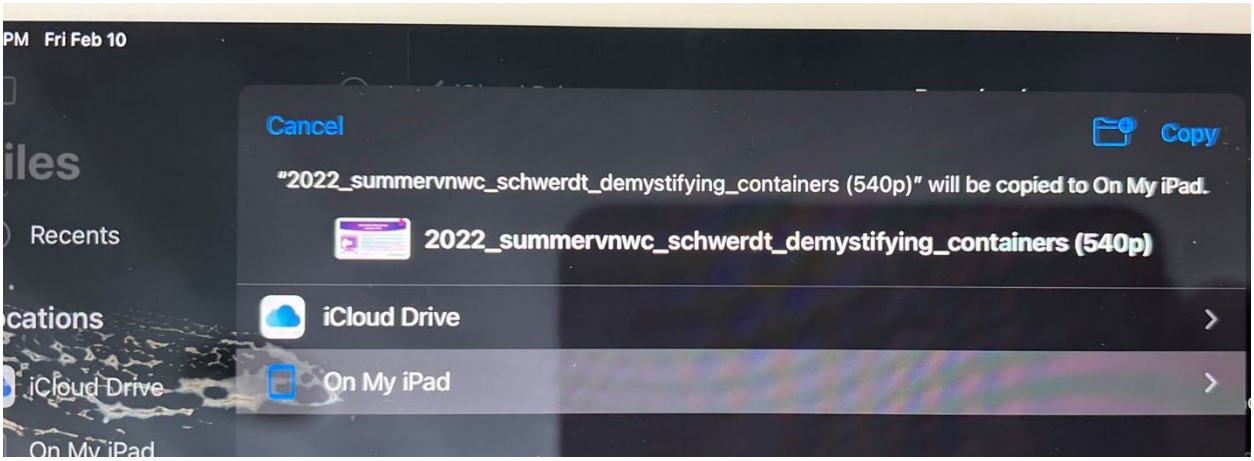
4) If the download doesn't start automatically, click "open in."
This may appear at the top or bottom of your screen.



5) Choose “Save to Files”



6) The Files app opens and you can choose to store the file on your ipad or on icloud.



Note: if you wish to ALSO view the recording on your iPhone, copy the file to iCloud Drive as well.

7) Open the File app to view your recording. Click on the file to watch your video!
